

Type of Change

Redesign – Querx sensor cap

Affected Products

Product	Item number	Old version	New version
Querx TH	EGN600214	1.0	1.1
Querx WLAN TH	EGN601215	1.0	1.1

Description of Change

The sensor cap for Querx TH and Querx WLAN TH has been changed in the following ways:

The two halves of the cap are now fixed by screws, instead of being glued.

A magnet has been added to the cap, in order to make it possible to fix it to surfaces that contain iron, nickel or cobalt.

The cap's dimensions have changed from 1.3 x 0.5 x 0.2 ins to 1.5 x 0.4 x 0.2 ins (L x W x H).

The item number has not changed. The devices are identified by the type plate.

Impact of Change

The new sensor cap makes it easier to replace the temperature/humidity sensor.

The sensor can be fixed to metal surfaces.
